

W w is for windmill

To make your windmill you will need scissors • drawing pin • pencil with a rubber on the end • the square template below

- 1 Either use the template below as a guide to use coloured paper or card or colour both sides of the square in any way you like.
- 2 Cut out the square and then cut along the dotted lines. Be careful not to cut all the way to the middle.
- 3 Punch out the holes carefully with the drawing pin.
- 4 Curl in the corners. The corner holes should line up with the centre hole.
- 5 Slowly push the drawing pin through all the holes, and into the side of the pencil rubber. Hold it down on a flat surface and keep your fingers away from the sharp tip!
- 6 Hold the pencil and blow straight into the pin-wheel so it goes round! The harder you blow, the faster it spins.
